Hi Aaron -

I wanted to let you know that some draft rule language for Minnesota's Class 3&4 industrial/ag water quality standards upcoming revisions went up on our website on Friday. We are still working on the supporting materials and are hoping to public notice the rule at the end of November, which would kick off the formal process, but if you wanted to start looking at the rule language and the methods for turning the narrative standards into permit limits - it's available.
